DETAILED ACTION

Preliminary Comments

1. Applicant's Terminal Disclaimer filed on 28 Jan. 2005 has placed the Application in a condition for allowance as written. The Terminal Disclaimer filed on 28 Jan. 2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of Ross, et al., U.S. Pat. No. 6,788,406 (7 Sept. 2004) has been reviewed and is accepted. The Terminal Disclaimer has been recorded. Accordingly, the following represents a reasoned statement for allowability.

Allowable Subject Matter

2. Claims 1-15 are allowable, since the prior art references, either considered alone or in combination, do not disclose or render obvious the limitations set forth therein.

3. Referring to Claim 1, the prior art references, either considered alone or in combination, do not disclose or render obvious the limitations whereby an optical inspection device comprises and image receiving unit, an elongated assembly extending from the image receiving unit, an image receiving aperture disposed on the distal end of the elongated assembly, wherein the elongated assembly is dimensioned to position the image receiving aperture adjacent to an object to be inspected, and wherein the distal end of the elongated assembly does not comprise a lens, in combination with the remaining limitations in the claim. Claims 2-15 are allowable based on their dependency upon the claim from which each is dependent.

CONCLUSION

4. Applicants' Claims 1-15 are allowed based on the reasons set forth above.
